

interviewer

How are you classified in ballet or other dance styles?

MARCEL MARCEAU

Probably, we may say somewhat that we are in a close relationship. However, dances have motion as main elements. The technical excellency of the beauty of the body, aesthetic sense and flying up in the air as lightly as possible are observed in general in a classic dance. However, MIME cannot be separated from the floor. MIME belongs to the ground. A motion has a dignity. In MIME, we actually do not jump. I cannot declare that MIME is the art of simply motion. I should say that MIME is the art of an attitude. Through this attitude, we can express sensuously that considered in the head. When I have taken the posture of this attitude, I have surely declared what performance means.
